Famous for the most competitive marathons, Boston also houses our center for the highest quality peptides.

Hear our collaboration stories with Harvard and Tufts universities on new peptide design!
Established in 2013, Active Peptide Company is based in Boston, USA. We produce kilogram-scale batches of high purity peptides for cosmetic companies and distributors.

- We collaborate with Harvard, Tufts University, and University of California on peptide design and development.

- We provide customer service and shipping from the USA. Our manufacturing center is located in China National High-Tech Industrial Development Zone in Shandong Province.
Leading Technologies in Peptide Design and Manufacturing

- 0-1 New Peptide Design
- 1-10 Process Development Tech Transfer
- 10-1000 Kilogram-scale Batches of Catalog Peptides
Catalog Cosmetic Peptides

Advanced Liquid-phase Methods
Kilogram-scale Batches
High Quality Peptide Powder
We Serve the world’s most reputable customers
Won 2013 Technology Innovation Award from China High-tech Industrial Development Zone
Global Customer Comments

“ I do appreciate your effort and integrity. I'll likely get more in the near future.
- N. Bauer, CEO of Nyles7 at Arizona USA

“ Thank you ! LOVING the GHK-Cu, so glad you found me!
- N. Nivolo, CEO of NCN Professional SkinCare at Connecticut USA

“ I love to talk to you guys. You are very professional and knowledgeable.
- F. Priet, Researcher of JFA Ceuticals in India

“ The package reached to us so quickly!
- F. Jang, Scientist of Seoul National University, Korea

“ Thank you for your strong technical support and working so hard to help us!
- G. Floyd, Pole Cosmetique, Purchasing Manager, France

“ The Sample you provided was the best peptide our customers have ever seen!
- H. Cheng, CEO of Shanghai Ruidong Biotech, China

“ The issue was all solved. Thank you for working so hard to help us!
- J. Gottlieb of InnoCent International GmbH in Germany

“ Thank you for your excellent services. It was such a pleasure to do business with you!
- R. Cloete of DRA Pharmaceuticals, South Africa
Advanced Technologies for Producing Kilograms in a Single Batch

We have made a significant breakthrough in kilogram-scale production of high purity peptides. Our unique liquid-phase synthesis technology has the shortest synthetic routes and avoids using any chromatographic purification, which allows us to produce kilograms of pure peptides in a single batch. This process is much faster, more cost-efficient, and eco-friendly.

—— Principal Scientist Dr. Lee Yu

Active Peptide
Flagship Products
(in kilogram-scale batches)

Why Buy Peptides from Us?

- Advanced Technology and Quality Endorsed by Dr. Loren Pickart
- High Purity
- Competitive Prices
- Environment Friendly
- Quality consistence and Stability: Kilograms produced in each batch

“If you want pure copper peptides, go to activepeptide.com.”

– Dr. Loren Pickart

Inventor of copper peptide, world-renowned biochemist & Skin Biology Owner
Our GHK Copper Peptides

Difference between Others and Ours

- **Other brands of copper peptide powder**
  Usually in flour form, due to traditional production process of freeze-drying and smash. It takes more time, steps, and resources to produce, so the production cost is high. The powder has larger surface area which makes it prone to absorb humidity, stick on the bottle wall, and harder to store and weigh.

- **Our brand of copper peptide powder**
  In crystal format due to our advanced liquid-phase synthetic method and crystallization technology. Due to its crystal format, our peptide is not prone to absorb humidity from air or stick on the bottle wall, which makes it easier to store and weigh.

Our GHK copper peptide has high purity >99%, the best quality in the world, endorsed by Dr. Loren Pickart. The purity is proved by Microconsultant, an American independent testing company.

- Crystal format of Blue Powder
- Quality and services endorsed by Dr. Loren Pickart, the inventor of GHK copper peptides
- Purity >99%
- Competitive Prices
- Easy to store and weigh
- Kilograms produced in each batch
- Shipping from the USA or China

Dr. Lee Yu, Founder & CEO

- Received his Ph.D. in organic synthesis from Chinese Academy of Sciences in 1999
- Led new drug development and peptide research in the USA for 14 years
- Won Special Contribution Award from Institute for Tuberculosis Research at UIC in 2006
- Owns two new drug development patents
- Developed advanced technologies to make it possible to produce large-scale peptides at low cost
- Winner of 2013 Technology Innovation Award from China High-tech Industrial Development Zone

Janet Du, MBA, Co-founder, President of Marketing & Sales

- MBA of University of Chicago in 2007
- 16 years of global experiences in direct and channel sales, product management, and marketing in biotech industry
- As a marketing leader of Thermo Fisher Scientific, led global vertical market program in its headquarter to shift company’s strategic focus from product lines to applications
- Developing marketing strategy, driving business growth, leading contract negotiation, and working with legal counsel

David Goldman J. D., Principal Consultant

- J. D. from Tulane University Law School
- Bachelor of Economics from Brandeis University
- Expert in new market entry, contract negotiation and business strategy
- Providing guidance and monitoring to channels on business development issues
- Educating project teams across geographies for new market entry strategies
